

Final Remarks

Claims 7 and 9-12 were previously held allowable.

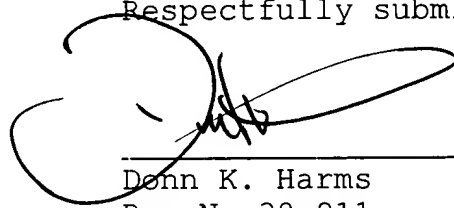

Claim 2 was held allowable with the addition of intervening elements. As claim 1 now has the elements of claim 2, claim 1 and all dependant claims should now be allowable.

The elements of allowable claim 17 have been added to claim 13 and therefor claim 13 and dependant claims thereto should now be allowable.

As such all remaining claims in the application should now be allowable.

Should the Examiner have any further questions or concerns the Examiner wishes to address by Examiner's amendment by telephone or otherwise, or should the Examiner have suggestions to more clearly define the subject matter of the claims to more clearly define the patentable subject matter, the Applicant's attorney would be most receptive to such.

Respectfully submitted,

Donn K. Harms
